

Sign your work with a personalized stamp that packs a wealth of professionalism into a tiny space.

These laser-engraved, rigid Delrin™ plastic stamps provide clear, crisp impressions on any type of clay – metal, polymer, air-dry, or ceramic clay. Fully customizable for your design, stamps are available in a range of sizes, shapes, and fonts. Stamps can even be created from simple designs or logos.

CREATE A STAMP WITH YOUR INITIALS OR A SHORT NAME

1. Determine your desired size and number of lines of text (up to three).
2. Decide if your design should be centered, flush left, flush right, or staggered (for multiple line designs).
3. Pick a TrueType or PostScript font already on your computer or download one of the thousands of free TTF or PSF fonts on the Internet. Keep it simple. A font that is too ornate may be difficult to read in a small size. Be sure the letters you use fit within the parameters of your chosen stamp size. *Remember, metal clays shrink during firing. Take that into account when designing your stamp.*
4. Choose whether the image should impress into the clay (“Standard”) or if the letters should be raised above the clay surface (“Raised Letters”). Note “Standard” or “Raised Letters” when sending your order.
5. Save your camera-ready artwork in a vector file (ai, eps, wmf, svf), and send it to us at contact@pmcconnection.com. Please note that jpg files are not vector files and will not produce a satisfactory image. Stamps are completed about ten days after they are sent to the engraver.

CREATE A STAMP WITH A LOGO ONLY

Would you like a logo instead of your initials? Consistent use of a single graphic image can strengthen your brand and make your work more readily identifiable. Even when working with pieces too small for a series of letters to be legible, a simple design can become your hallmark. Simple designs can be submitted in the file formats listed above.

Stamp directly on your finished piece or create tags of many shapes and sizes.

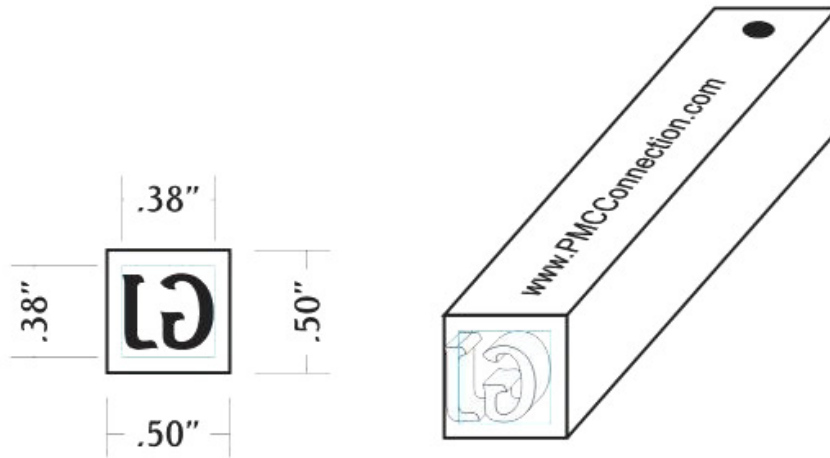

Keep the image clean and crisp, or distress to match the look of your finished piece!
